

MANAGED SERVICES

iBridge Cloud Technologies Managed Services provides our customers in Government and Commercial the latest in technology in world-leading data centers at competitive prices.

iBridge has long-term partnerships with industry-leading manufacturers and is widely recognized as the benchmark in Managed Services from Traditional and HyperScale Data Centers to On-Premise Managed Services. We provided our customers with an exceptional range of solutions that we can customize to meet their specific needs.

At iBridge, we pride ourselves on being a strategic partner with our customers for their Managed Services challenges. Our Certified Engineers and Engagement Managers partner with our customers to deliver personalized solution architectures to ensure results are cost-effective, align with all needs, available 24/7, and are secure.

SOLUTIONS THROUGHOUT THE UNITED STATES

iBridge provides solutions to large private and public sector customers throughout the Western United States, including State of California agencies and departments, California counties and cities, and state and local education.

HOW WE CAN HELP

- ✓ We partner and are certified with industry-leading vendors.
- ✓ We take the time to understand your business to ensure the right technology solution is designed and implemented to address your unique needs.
- ✓ We have technical depth that provides customers with a wealth of experienced professionals and internal support and bench strength.
- ✓ We enable and empower our customers through education and change leadership.

WHY iBridge

Local, experienced, proven engineering team

iBridge Cloud Technologies has a long history of delivering the highest quality data solutions to both government and commercial customers. iBridge's certified engineers bring extensive experience with proven results, making us a leader in Next Generation Cloud Protect strategy and execution.

iBridge Cloud Technologies Managed Services

STORAGE AS A SERVICE (STaaS)

iBridge provides STaaS, a subscription pay-per-use secure storage solution that delivers cost-effective “anytime, anywhere” access to your data. iBridge’s flexible STaaS solutions ensure security and availability of mission-critical applications and data archiving or long-term backup

MONITORING AS A SERVICE (MaaS)

iBridge Monitoring as a Service brings together machine data, logs, and information behind the running processes within your data center. This subscription service provides a single integrated view of IT activities enabling smoother IT operations, rapid identification of anomalies, and enhanced abilities to make intelligent technology decisions.

OPTICAL FABRIC SERVICES (OFaaS)

iBridge Next Generation Optical Cloud Interconnect is your low latency, secure, and flexible on-ramp to the public or hybrid cloud. Built with industry-standard Optical Fabric standards, this service lets you easily extend your organization’s data center network to your cloud resources with the assurance of dedicated, always-on, fast, and reliable connections.

DISASTER RECOVER AS A SERVICE (DRaaS)

iBridge Disaster Recovery as a Service is a subscription cloud computing and backup service that enables cost-effective protection for machines, applications, and data from disruption caused by disaster. It gives an organization a total system backup that allows for business continuity in the event of system failure without the cost and complexity of maintaining your own dedicated disaster recovery site.

INFRASTRUCTURE AS A SERVICE (IaaS)

iBridge Infrastructure as a Service is a subscription service delivering virtual infrastructure that enables you to install and control your own applications while iBridge manages and monitors the underlying servers, storage, and networks. Customers have the choice to add more resources as their need for storage and performance grows without the necessity of purchasing and maintaining their own infrastructure. Your team can concentrate on your business and we will handle the day-to-day maintenance and operations.

HIGH SPEED INTERNET

iBridge provides high-speed Internet with portability across our fiber optic services ring.
